

Toronto's Multicultural State: We Visit A Sikh Temple

Shri Guru Nanak Dev Ji (1469-1539)

The founder of sikh religion Baba Nanak Ji's first statement after his prophetic communion with God was " There is no Hindu, nor any mussalman (muslim)." It means love your neighbour as yourself. Baba's above picture has now adorned Community Kitchen Hall of Pape Gurudwara for little over 3 decades which was donated by a Gursikh Devotee 'Grewal (Fauji) Sahab - a new immigrant from

Sikh Martyr: Bhai Taru Singh Ji

Muslims (Sons of Allah) cut the scalp open of Bhai Taru Singh Ji on his refusal to embrace Islam in the middle of 18th century when whirl wind of muslim bigotry and Islamic state conversion swept Hindustan (India) and sikhs were reduced to a life of humiliation in their own state Punjab. Zakaria Khan was the muslim governor of Punjab in 1745 A.D. Before his death, Bhai Taru Singh Ji, put a counter question to Zakaria Khan, "Will I not die if I become a muslim; if we all have to die one day irrespective of our religion, then I would die as sikh of my Guru..."

Baba Gurjeet Singh Ji (Jandliwale)

Baba Gurjeet is on preaching tour of GTA and adjoining Sikh temples for the last 10 months currently offers religious discourses at Pape Sikh Temple Sundays from 11 a.m. to 3 p.m. All are invited.

Elite Bankers Threatened to Release Weaponized Strain of Avian Flu - Military Coup Against Bankers in Progress

Posted By: Rayelan <Send E-Mail>
Date: Sunday, 8 March 2009 RMNews FREEDOM, CA - RMNews was just given information from a military special operations field operative.

As you read this please remember that RMN has stated many times that the leaders of the new world order are NOT the people you see in the news. Most of the real leaders are nameless and faceless. Keep this in mind as you read this article.

The Operative said the Military just declared war on the International bankers. NOT because they were stealing our money... But BECAUSE the owners of the federal reserve banks just threatened Congress, the President and the entire population of the United States with a massive biological attack... Most probably a weaponized strain of bird flu.

Asian Intelligence knows about this and has recalled most of its personnel from the United States. This quick withdrawal signals that the time for the release of this weaponized strain of bird flu is near.

Several CIA "bankers" have already been killed. Others are missing and presumed to be in secret inter-

rogation sites, most probably aboard submarines. The special unit that was dispatched to carry out this operation was told to extract from their prisoners as much information as possible about the collapse of the financial system. They want to know where the money went. Who gave the orders to pull the plug and sink the system. They want names, dates, places, figures, and history going back years. They want to know who was behind all of this, when it started and where that person is now.

The Navy appears to be heading this coup against the owners of the federal reserve and the other City of London bankers.

Remember... Faction Two lives inside the Navy. They refer to themselves as "the Nebraska Navy" because their funding comes out of a Naval Reserve District (NRD) on Offutt Air Force Base in Omaha, Nebraska. (NRD) sometimes stands for Naval Retirement District. This is where the money comes from to field these kinds of operations. I don't think it is there anymore. I doubt that they would be so foolish as to leave it there since they know Rumor Mill News outed this location many years ago.

This coup against the owners of the Federal Reserve appears to be run at the highest level of the military... With Admiral Mullens, Chairman of the Joint Chiefs of Staff.

Admiral Mullens was previously Chief of Naval Op-

erations for the Navy, Commander, U.S. Naval Forces Europe, and Commander, Allied Joint Force Command Naples.

This action appears to have the blessing of the President. I don't know about the Congress.

The field operative source stated that doubles are now in place for all high ranking officers who are part of this coup against the owners of the Federal Reserve.

Take a look at the three photos of Admiral Mullens. Will the REAL Admiral Mullens stand up??

Please follow Admiral Mullens recent comments: Admiral Mullens said: "Iran has enough low-enriched to produce a nuclear weapon, but it's important to note it's low-grade, and to enrich it would take time."

RMN interpretation of this statement: Admiral Mullens is ramping DOWN the prospect of an Israeli attack on Iran. Israel is one of the military arms of the new world order. The two other main ones being Britain and the United States. The new world order is made up of the Owners of the Federal Reserve.

McGuinty bans public from forestry input for logging industry profits

Peaceful Parks Coalition Ontario Forestry News Sweeping New Forestry Rules

Earlier this year, the McGuinty government introduced sweeping changes to the rules that govern forestry practices in Ontario. They include:

the collection of woody debris off the forest floor to promote the biofuel energy industry;

The new forestry rules will review the closure of logging roads to permit access for biofibre harvesting for the biofuel industry. While the biofuel industry is currently being promoted as an alternative 'green' energy, it is no more advanced than burning firewood. In the natural world there is no such thing as 'waste'. Organic matter is naturally recycled back into nutrients vital for soil fertilization. Strip mining the forest floor of its nutrients will deplete and erode soils and compromise future forest renewal.

* introducing selective genetic tree stock;

The Ontario Ministry of Natural Resources' response to climate change generally falls into the categories of adaptation and mitigation. Mitigation means taking action to reduce the release of greenhouse gases and so lessen the related impacts of climate change. Adaptation means taking action to best adjust and cope with the expected effects of climate change. The ministry has long argued that the cutting

of mature forests mitigates the release of carbon emissions because once trees reach maturity they stop absorbing carbon and begin releasing it instead. The introduction of selective genetic tree stock will help forests 'adapt' to changing climate conditions.

The Ontario government is proposing to replace the natural forest state with a 'new and improved' forest composition by selecting genetic tree stock that will withstand the impacts of climate change. It may include more deciduous species and harder genetic traits. Eventually as original natural forests are converted to manufactured forests, knowledge of forest ecology will be lost as will the ability to set a 'natural benchmark' for forest management planning.

* changing the definition of 'sustainability';

The new forestry rules have eliminated the requirement to establish a "Natural Benchmark" as a standard to compare a managed forest. In the past, the objective of a forest management plan was to emulate the evolution of a natural forest in the absence of human management. Without a 'natural benchmark', a major tool for determining forest sustainability has been removed. In the new rules, sustainability has been redefined to meet arbitrary wildlife habitat targets achievable within wood supply objectives; unrelated to natural wildlife populations.

* limiting public consultations in forest management planning.

The main objective of the new forestry rules is to streamline forest management

planning. Part of this 'streamlining' is to limit the public issues resolution process. The Ontario government will continue to seek public input on new forestry plans but will limit the second stage of public engagement: the process that seeks to resolve outstanding public objections to forestry practices (logging). The national edition of the *New York Times* recently printed an article about tissue products, recycled fibre and how tissue product companies including Kimberly-Clark are trashing ancient forests such as Canada's Boreal. This edition and the online version has a readership of 22 million.

Read it: http://www.nytimes.com/2009/02/26/science/earth/26charmin.html?_r=1&scp=1&sq=tissue&st=esc
