

Toronto Survival In The New Millennium

By Victor Fletcher
 Publisher, Journalist, Radio Personality,
 Political Activist, Astrologer

Why do my reporters continue to be shadowed in the Beaches? Why do citizens there warn me about spooks in tow around my workers?

For the past two years at least, I've had my people tell me they weren't paranoid — that people were following them, shadowing them and using telephone cameras to take their photos on a regular basis.

On at least one occasion they pulled out a regular digital camera to take the usual photo.

CSIS operations consist of breaking up the city into areas with so-called targets in the area amounting to some 1,000 people. Then, their agents, consisting of up to 50 people in a single area take turns shadowing 'targets'. Since these are free-lance informers they get paid for 'making' a hit or contact or observance of one of the 1,000 people.

This is all done at the public's expense of course. Since I've never indulged in any threats or terror incidents I don't understand why they bother to observe.

If anything, I've been the one who has been threatened, harassed, surveilled for no reason. This goes back decades.

One time, I had my home burgled for a

ten dollar alarm radio clock along with three old personal telephone books that I never used any more. They left a brand-new portable TV in the middle of the living room floor.

It was a sophisticated break-in as they knew enough about burglaries to shut off the power in the first place.

Then, when I reported the burglary I had no less than 6 long-coated police superintendent types show up and track snow through the house — it appeared they were curious as to how the spook 'pros' would do a break-in and seemed to know all about its timing.

No group of police would show up for a

Criminals Hiding Behind Police Badge

The name of retiring police superintendent is WAYNE PEDEN his last day of work was February 27, 2009 at 55 Division (Beaches).

The callousness and miseducation/ uneducation of police has caused wrongs to people resulting in miscarriage of justice: Romeo Phillion 37 in jail for murder, William

ten dollar theft otherwise.

A spook I turned into my own informer told me how RCMP protected him in break-ins and vandalisms of the 1970s when he attacked Third World Books, women's book store and Communist Party bookstore as well as a few Trotsky hits.

They were the talk of the town back when we put out the *Guerilla* anti-war newspaper in the early 1970s. Further spooks showed up to report on our CITY-TV weekly show as well.

When we had real news scoops the had a fit and then confirmed what we said was true.

They also tried to involve us in Rochdale Mullins-Johnson 12 years for raping and suffocating four year niece, Rob Baltovich 8 years in jail for killing girlfriend, Alain Oliver 8 years in jail for drugs in Thailand on death row - Following these wrongful unjust convictions it is now asked how to punish those responsible for thisAn accountability -- problem: faulty witness identification, paid police informants who lie and flawed expert evidence.

College, the marijuana source for spook info. Years later we found out the religion of the people who set up that fraudulent operation as well.

We weren't too impressed by CITY-TV staff either and before too many years went by reports of cocaine use was coming to us.

When we interviewed Michel Chartrand, a victim of the War Measures Act in Quebec Moses Znaimer saw to it that the video tapes were destroyed.

Znaimer couldn't tolerate a Canadian patriot who stood up to zionist tanks rolling over Palestinian Volkswagens as he reported at U of Toronto lectures.

Unfortunately, local police didn't have the IQ necessary to see the manipulation of news carried out by Moses — only looking to justify a few more hours of police pay-time dollars.

When Lenin took over Moscow he used the same police informers that the Czar employed. All paid for by New York zionist bankers of the day who paid Trotsky and Lenin the equivalent of \$90 million.

Reports of a Russian mob operating in Toronto's east end are persistent. People are either afraid to report this or else the police tell them they cannot do anything. Only under-cover police operate against them — we hope!

Monsanto-Tyssen Triumph over Farmers: New Laws Criminalize Organic Farming

Regulate all Farming with red tape only agri-business corporations can afford received:

For those who do not have video capabilities, I have included a transcript of the Video below. Please pass to others.

The Criminalizing of Organic Farming in the USA!

<http://www.youtube.com/watch?v=tqx9YU-QUcg&feature=email>

Transcript of video:

The new administration is pushing draconian farm controls through Congress as fast as possible and has coordinated the bill so there will be NO DEBATE. Opponents say they have less than 2 weeks to stop farming bills that will put organic farms out of business.

The new found "safety bills" are sponsored by agri business giants, Monsanto, Tyssens ADM, etc. Under the bills, the Dept of Agriculture will be allowed to order organic farmers what to feed their animals, how to medically treat them and what toxic sprays to use. There would also be penalties beyond the ability for most small farmers to

pay. Buried in the bills are regulations that criminalize all aspects of organic farming by listing them as "sources of seed contamination".

The bills will industrialize farms, force farmers to buy chemicals and drugs... and/or face \$500,000 in penalties!!

Obama to Nationalize Farms and Make Any Organic Farming Illegal!

<http://www.youtube.com/watch?v=tqx9YU-QUcg&feature=email>

We're at a pivotal point in history ... at the place where we're smart enough (due to using the Scientific Method in the physical sciences the 1700's) to completely destroy ourselves and too stupid (due to ignorance of application of the Scientific Method in the volitional sciences) to prevent our own extinction. This time we need an ideological solution rather than a political solution ... as was amply demonstrated in the last presidential elections.

The good news is that Andrew Galambos, an astrophysicist, has created that solution. Now, there ARE scientifically provable solutions to eliminate most social problems (poverty, war, crime, unemployment, riots, inflation, etc.). It is no longer necessary that every civilization must collapse, as all have done for all of recorded history. Our 6,000-year unsuccessful search for freedom may be approaching a successful conclusion. Please help any still-thinking friends check at www.VolitionalScience.org.

Monsanto's Many Attempts to Destroy All Seeds but Their Own

Dr. Mercola Some say that if farmers don't want problems from Monsanto, they simply shouldn't buy Monsanto's GMO seeds. But it isn't quite that simple. Monsanto contaminates the fields, trespasses onto the land taking samples, and then sues, saying they own the crop.

seeds, seedling Meanwhile, Monsanto is taking many other steps to keep farmers and everyone else from having any access at all to buying, collecting, and saving of normal seeds:

1. They've bought up the seed companies across the Midwest.

2. They've written Monsanto seed laws and gotten legislators to put them through, that make cleaning, collecting and storing of seeds so onerous in terms of fees and paperwork that having normal seed becomes almost impossible.

3. Monsanto is pushing laws that ensure farmers and citizens can't block the planting of GMO crops even if they can contaminate other crops.

4. There are Monsanto regulations buried in the FDA rules that make a farmer's seed cleaning equipment illegal because it's now considered a "source of seed contamination."

Monsanto has sued more than 1,500 farmers whose fields had simply been contaminated by GM crops.

Dr. Mercola's Comments

There is a reason why I believe Monsanto to be one of the most evil companies on the planet, and this is in large part due to its activities relating to controlling food production through controlling the seeds to produce it.

For nearly all of its history the U.S. Patent & Trademark Office refused to grant patents on seeds, viewing them as life-forms with too many variables to be patented. But in 1980 the Supreme Court allowed for seed patents in a 5-4 decision, laying the groundwork for a handful of corporations to begin taking control of the world's food supply.

Since the 1980s, Monsanto has become the world leader in genetic modification of seeds and has won at least 674 biotechnology patents, more than any other company.

This is not surprising, considering they invest over \$2 million a day on research and development!

But Monsanto is not only patenting their own GMO seeds. They have also succeeded in slapping patents on a huge number of crop seeds, patenting life forms for the first time -- again without a vote of the people or Congress. By doing this, Monsanto becomes sole owner of the very seeds necessary to support the world's food supply ... an incredibly powerful position that no for-profit company should ever hold.

How do they defend this blatant attempt to control the food supply?

CITY LAW CENTRE

Lawyers & Associates
 Practicing Law for Poor People
 Our Volunteers Make A Difference
 Free Notarization for the Needy
 Mark Dahiya, M.A., LL.B. is a member of Ontario Bar.

CityLawCentre@yahoo.ca

Needed are generous donors to help set-up City Law

Centre as a charity to render free legal help to the destitute of Toronto. CLC intends to impart free legal help to street people who are overlooked by the legal profession as they cannot afford lawyers; legal-aid won't help them as they don't have an address and bureaucratic papers, etc.

On occasion, they commit suicide in the street as a relatively small problem may appear insurmountable to them because of their poverty, health and lack of legal help. CLC ventures to undertake this challenge only through public donations and refuse to accept grants from any level of government except office accommodations.

CLC now accepts applications from retired lawyers, professionals, support staff and others ready to help those in genuine need as free volunteers in a legal environment without remuneration.

Mr. Gavin MacKenzie, Treasurer, Law Society of Upper Canada has been kind enough to amend By-Laws for Volunteer Lawyers to practice law without paying license

fee to help the needy in their community free at the request of *Toronto Street News* writer and free lawyer Mark Dahiya.

Your help will be greatly appreciated.
 Donations of furniture, computers, shelving, filing cabinets will be greatly appreciated.

Office Accommodation if one can so donate. Contact info on page 4.

Thank you.
 Mark Dahiya, M.A., LL.B. Volunteer Lawyer
 CityLawCentre@yahoo.ca

It is time for the public to become involved — these problems can become anyone's — help now for all Canadians and their futures.

It is exceedingly difficult to proceed — write to the mayor to ask for free lawyer's free office accommodation to help the homeless.
