

# Another Child Has Died Katelynn

look in to any of the deadliest cases makes us wonder how much of what there saying is true. In Jeffery's case we and many others believe that the

the families healthy and standing not just take children away.

Many of our families would welcome the help from someone who is non-threatening, non-judgmental and more open minded caring with this help.

<http://angel-love8.tripod.com/>  
Once again a child had died at the hands of abusers. Below are letters sent to our politicians regarding this kind of disaster and the hell some children have to live in because our protectors have not come to truly understand what abuse is or how to deal with it.

They say in main stream media that they are going to look into the matter, but they have promised this so many times before and children keep dying and ending up on the streets.

Katelynn was beaten and abused for a very long time before her death. As usual no one knew and it could have been prevented.

**I pray they listen this time and actually do something that will benefit all.**

Blessings  
Angel

**Our system keeps allowing Children to be abused even to the extent of death.**

Jesse Wilson  
LoveCry

When the child dies the main focus seems to be on the care givers but never on the fact that they should have never had children in there care and why they where placed there by our system and now another child has died.

The only thing that has changed since the death of Jeffrey Baldwin is that they added an internal review board which will only listen after going through the C.A.S complaint procedures which takes weeks if not months for the process steps in order (worker, worker and supervisor, branch manager, executive director, board president ) this is what are system added after Jeffrey died the review board that will only listen if your not in court to make us feel safer about our children safety.

Still no outside organization is allowed to view there files including the ombudsman, our politicians, our police no one but yet we as a society have been believing that our children our safe why!!!

Even with all their secrets do we really care about our children or just like to say we do so that we feel better about ourselves because if we really cared about our children we would put more effort into seeing our(every kids) kids needs are met and would not let the system we pay for hide from the society it is disgusting that a child can die do to abuse and the Homicide detectives are not allowed to see there files. We as society as people stood back and let it happen, it was a mistake right makes things easier but then why if it was a mistake why did they not show it was a mistake why was it covered up.

The C.A.S.'s should be open to other organizations because that would only help stop these mistakes from happening, because I have heard from enough C.A.S.'s workers that they have so many case loads it is overwhelming, then the have there own lives on top of have to deal with there own family problems it is allot to deal with there bound to make a mistake, and it is not mandatory for them to take a course in Child psychology.

So with the head games that are going nowadays it is very difficult with the amount of case loads they have to really see what is happening they need help or our children will not receive the help they need to grow up in a healthy atmosphere. Please look more closely at what is happening are Children and are future depend on it.

## To The Premier of Ontario Honorable Dalton McGuinty

Our Children Need Protection From The Protectors

Jesse Wilson and Angel Femia  
LoveCry

We are writing this letter in regards to all the Children's Aid Society's and the request from the ombudsman to be able to investigate complaints against the society.

We find it absurd that the Society would put up such a fight not to have someone outside the agency seeing what is going on when its for the safety of our children considering what happened in the Jeffrey Baldwin case and many others. Jeffery was starved to death over a period of years, and the worker still has a good pay check, respectability and a solid position at the society.

Because the Society is putting up such a fight not to have anyone outside the agency

Detective in charge was denied the full content of information to proceed properly with the case in of itself. We believe that the Society workers on Jeffery's and many others cases should have had to face charges of neglecting their duties as official Society workers.

We believe that the Society should be held accountable for their part of their responsibility within the situation regarding Jeffery's and others whom have died in their care.

It is true that if you have a complaint against the Society you have to go to your worker then the worker and supervisor than the branch manager than the executive director than to a meeting with the board of directors than to the ministry of children and youth services These organizations are all under the same roof all have different ways on saying the same thing, but you're not allowed to voice your concern to anyone outside the agency.

When you do voice your opinion they discredit you. They lie on reports about what people actually say. The quotes get twisted enough to allow the worst impression to be judged by our lawmakers. (If any of the people being quoted on the Societies paperwork actually testified to what was truly said any judge would see the difference, of course we are never called to speak). Therefore if a worker does not like you, you lose your children or parents and in many cases these Society workers are believed, not through earning this trust but because they are Society workers..

Just last weeks at LoveCry a few of us walked into a meeting with a new mother and a Society worker. The Worker was threatening her and using gossip to do so. There was no fact at this point, only jealous gossipers angry and wanting to hurt this girl. (She is no perfect child but is not anywhere near as rotten as the society has on their paperwork). This girl got scared an lied and thus gave the Society a reason to take the new borne infant. (the Society worker terrified this girl and scared her into lying. Several of us witnessed this incident).

If the Society truly believe that what they are doing are the right procedures to ensure the safety of our children why would they be so concerned to have someone outside the agency investigate parents complaints.

We find this very concerning since they have proven to stand by their workers even if a child dies.

They recently made it a law this February 2006 that it is mandatory to do criminal background checks so what about all the children before this date just because their not dead does not mean they don't need our help.

It is up to us, the parents to stand up to this system for our children's future and our own if we don't speak up now they will continue to do what they want even if it's not for the best interest of the children as we witnessed in 2004 when Jeffrey died in the care of convicted child abusers, ( and there were many other before Jeffery).

The fact that many of the Society workers do not have psychological training or personal experience. (many not even having their own children). There Society workers are not required to have a degree in child psychology so how can they really know what's best for the children.

Our children need someone outside the agency to ensure their safety and as parents it is our responsibility to make sure the needs of our children are met.

Our children also need people in better states of mind to help the entire family heal. Most times when a child is being abused either the parent is just doing what they have learned in life and do not know this is abuse or they are repeating an abuse pattern that goes way back and was never addressed.

We believe that the best place for any child is with their families but if the family is in trouble, the family needs help. Maybe we will find that the problem lies within the fact that the family needs help for abuse issues not just the children. The idea here being work to keep

How much longer are we going to allow the Children's Aid Society's to tell us our children are lying or their making up things to get our attention, (when they tell us they are or have been abused).

Then the best answer they can find is to tell us that our children need to get away from us or be put on drugs to keep them in line and under control.

Many of the Society workers have no true understanding of the child's mind so why are we allowing them to pass there judgments on to our family units.

We believe without child psychology and experience on raising children the society workers do not have the proper degree to say weather abuse has happened or not. All they have is a right to there opinion.

We are also aware that some parents will lie to protect their pride and ego's but that does not mean they all do. Why does this always mean that the black paint bush covers us all and that the honest parents have to also suffer?

If you believe that someone outside the agency should have access to investigate complaints speak up now because the longer we wait the more children go unheard.

## Samantha's Letter

I have known Samantha Brown almost all her life and will attest that what she has written is true. This same sinerio is true for many children in North America.

When the authorities ask why we have violence, guns, stabbings and savage beatings on our streets, why there is so much drug abuse, why there are so many robberies with deadly violence, why our family units are shattered, and why we have so many homeless kids and adults we need go no further then to say Abuse in all its ugly forms.

Check out Samantha's Web Site at: <http://undyingvoice.tripod.com/>  
Below is Samantha's story. It speaks for itself.

Angel

To The Prime Minister Of Canada

## Greetings Mr. Harper;

This is about Abuse.

Let me introduce myself, I am Samantha Brown and I am 17 years of age.

I am writing this in regards of the things I have noticed in our streets and homes. I wish to bring attention to what has to be done in order for our world to work.

I have been abused and I am working on undoing the damage that has been done. I do not wish to see another child wounded by friends, family and our society. The human race is currently dying slowly. We seem to believe we are not animalistic but all I see is us abusing one another for sometimes no good reason at all. Just because we are spiteful and hate ourselves.

I am not going sit back on this issue, Prime Minister, I flat out refuse. I am working

Angel Femia

with LoveCry. These people are also pushing the issue of Abuse and I am tagging along for the ride.

Today, I felt like I have done nothing to actually get the word out. Now, here I am writing a heart-felt email to our Prime Minister. Please just hear me out.

I am young and I realize our world is hateful! It is sickening. I want to cry when I sit and think about how hateful and malicious I have been to everyone in the past and how much I am willing to change.

You have children, how would you like it if your children were forced to live in a home while people do horrid drugs in the living room?

How would you feel if you could change that?

Even help a little by taking those drug addicts away?

I am not saying to change one life, help change them all! Help us, children.

Help us at LoveCry. Mister Harper, I can not help if this doesn't strike you as a plea for money. It is not. It is a plea for help.

Today, I will walk by drug addicts with children and homeless that just need a little help. In my short years I have learned that a little kindness goes so far.

I remember standing in front of my little sister screaming for her to go upstairs so I could take the beating for her. I remember listening to my parents drunken fights while I tried to sleep.

I remember how I felt.

I remember that I have to help the children now and I will with your help or not.

But, even just hearing me out and understanding that our world must change.

Please, get in contact with LoveCry. Please help us save children from a life of pain.
