

NASA Study Shows Sun Responsible For Global Warming!

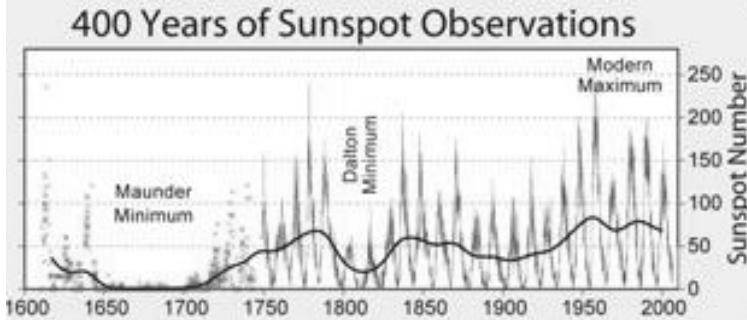

entirely covered in ice. Tell me: is the earth warmer today than it was 1,000 years ago? Did they have SUVs and coal power plants in the days of the Vikings? This isn't tough to figure out, people.

By Bob Ellis on June 5th, 2009
From DailyTech, we have still more evidence that any warming occurring on planet earth is coming from natural sources and is cyclic in nature—NOT from the evil capitalism that Al Gore, the UN politicians at the IPCC and other socialists love to blame.

ing to Robert Cahalan, a climatologist at the Goddard Space Flight Center, "Right now, we are in between major ice ages, in a period that has been called the Holocene."

causing earth to warm up when the most obvious source of heat hangs over their head every single day.

AGW simply doesn't pass the smell test. Nor does it line up with the objective data.

A new research report from a surprising source may help to lay this skepticism to rest. A study from NASA's Goddard Space Flight Center in Maryland looking at climate data over the past century has concluded **solar variation has made a significant impact on the Earth's climate.** The report concludes that evidence for climate changes based on solar radiation can be traced back as far as the Industrial Revolution.

the "scientific" community were really honest, it would be the worshippers of the religion of anthropogenic global warming who are called "skeptics," wouldn't it?

solar activity coincided with the Little Ice Age when Europe and North America experienced bitterly cold winters.

Things like cyclic solar data, warming occurring on other planets such as Mars and Jupiter just don't line up with the suppositions of the AGW worshippers. They craft all manner of complex calculations and "what ifs," but in the end the best they can do is say things like, "Well, we can't prove it now, but by the time we can, it'll be too late."

Research shows the sun goes through 11 year cycles. At the cycle's peak, solar activity occurring near sunspots is particularly intense, basking the Earth in solar heat. Accord-

Because it is those pushing this silly theory that our puny SUVs and power plants are

About 1,000 years ago, Greenland was warm enough for the Vikings to colonize and grow vineyards. Today Greenland is almost

And we're supposed to watch our electric bills go up 40% and see our economy devastated on what-ifs and a bunch of garbage that not only doesn't match the evidence but doesn't even pass the smell test?

9/11 Truth Activist Sues Glenn Beck & Fox News for Defamation

An East Coast 9/11 truth activist is preparing to file a defamation lawsuit against TV / radio personality, Glenn Beck, the

producers of the Glenn Beck Program, and the Fox News Channel.

Specifically, Greg Hoover will be suing the above-described defendants in Federal Court for Beck's having repeatedly broadcast statements characterizing those who question the government's official version of the events of 9/11 as, "anarchists," "terrorists" and as persons denying the Holocaust.

The complaint will note that - on October 22, 2007 - Beck suggested that those identifying themselves as associated with the 9/11 truth movement are "dangerous" "anarchists" who deny the Holocaust, and are "the kind of

group that Timothy McVeigh would come from."

The suit will also note that during Beck's June 10th broadcast Beck linked the murder of the Washington D.C. holocaust museum guard with "9/11 truthers."

As I have previously written, suing people for defamation who falsely claim that 9/11 activists are terrorists could be a good way to stand up to these bullies (I have not personally analyzed the legal issues involved, and have suggested Hoover consult with an attorney).

Hoover told me by email:

Copies of my actual initial filings will be

available for media distribution within the upcoming week...

I do so having now cast off all other personal concerns. Having chosen sides... I'll stand with the patriots.

Godspeed, Mr. Hoover.

I will update this post with links to Mr. Hoover's complaint as soon as it is available.

Note: Mr. Hoover has not requested either legal or financial assistance. However, if you are an attorney experienced in defamation claims, please let me know, and I'll pass on your name.
